The optical construction includes ultra-low dispersion (UD) optical elements that work to reduce aberrations and are protected by dust- and moisture resistant seals. Autofocus is powered by the UltraSonic Motor (USM) for quiet focusing, while the Hybrid Optical Image Stabilization can compensate up to four stops – excellent for challenging macro shots. Combined with the fast f/2.8 aperture, you can be guaranteed to get that perfect picture no matter the conditions. This superbly constructed and designed lens is simply unrivaled in its class.
